

## WFCB Minor 2015-2016

**Wildlife, Fish, and Conservation Biology (WFCB)** is an ecologically oriented major that addresses the interactions of humans with animals in natural and disturbed environments. Students are trained in the basic sciences, mathematics, and the biology and conservation of vertebrates in California and in many other parts of the world. The emphasis on basic sciences provides our students with the intellectual flexibility to handle the varied and often unexpected problems faced by biologists in the field and laboratory. It also makes sure students are prepared for graduate and professional schools and for alternative careers.
